Propel your career to new heights

Workshop on Business Continuity, Disaster Recovery and Crisis Management

Introduction

"Failing to Prepare is, Preparing to Fail". Business environment has become more dynamic, volatile and also more vulnerable to natural, accidental, technological and man-made incidents. How well is your business prepared for the next power outage, IT failure, fire, cyclone, Tsunami, terrorisms, fraud, industrial's unrests, sabotages, accidents, floods, etc? Is your Business Continuity Plan (BCP) non-existent, or perhaps limited to IT outages and backup tapes? Then this program gives you all the necessary expertise to develop a practical, compliant, holistic Business Continuity Plan. You can finally achieve a plan that helps you continue 'business as usual' before, during and after any disaster.

Benefits of a proper Business Continuity Plan

- Reducing risks, and improving the capability of your organisation to continue critical activities "no matter what"
- Providing shareholders, customers, employees, 3rd parties and general public with confidence in your business
- Gaining competitive advantage when responding to RFPs
- Meeting regulatory requirements
- Achieving insurance premium discounts
- Ensuring common terminology/language about BCM/DR across the organisation
- Enhancing motivation of your teams to perform well in regards to BC/DR testing and documentation
