

Propel your career to new heights 3-day workshop on Implementation of Information Security Management System based on ISO 27001:2013 Organized by Velveer Corporate Solutions in association with SGS India – leading certification body

Introduction: Information Security has become a very vital 'Business Process' to run an organization successfully. The organisation should be capable of protecting the vital information resources of the company to run their business. Failing to protect the information will result in both tangible & intangible losses and sometimes will lead to 'Out of Business' situation. These necessitate a proper security system in place and in the past same has been managed without any systematic and structured management system.

About SGS: SGS with head quarters in Geneva/Switzerland is the world's leading inspection, verification, testing and certification company with the network of over 1500 offices around the world. SGS provides independent services that touch the lives of millions of people across the globe. SGS services enable the customers to operate in a more sustainable manner by improving quality and productivity, reducing risk, verifying compliance and increasing speed to market.
